FOR GROWN-UPS

Why Open Spacing Helps Visual Comfort

Lots of white space

Busy, crowded pictures can feel tiring for children who experience visual stress. Every design here is a single, simple object with plenty of room around it.

Thick, clear outlines

Bold 4pt lines are easy to see and easy to stay inside, so coloring feels calm instead of frustrating.

Short, clear labels

Each picture has one short word in a large, dyslexia-friendly font (Lexend), so children can read it with confidence.

Left-to-right paths

At the bottom of every page, a dotted path runs from left to right. Tracing it practices the eye movement we use when reading.

Tips

Use soft, even light and avoid glare. Try colored pencils or crayons in favorite colors. Keep sessions short and praise effort, not neatness.
